## TIRE PRESSURE MONITORING SYSTEMS

- **MONITOR REAL TIME**  
Notifies System status for sensors, pressure, temperature and battery life
- **WIRELESS TRANSMISSION TO THE DRIVERS SEAT**  
Transmits pressure and temperature directly to the Dashboard Monitor
- **VISUAL & AUDIBLE ALARMS**  
When a problem arises transmits alarm directly to the Dashboard Monitor
- **LIGHTWEIGHT EXTERNAL SENSORS**
- **REPLACEABLE SENSOR BATTERIES**  
Low cost and easily replaced in minutes
- **SYSTEM SLEEP MODE**  
No movement sends the monitor to sleep to reserve battery power. System comes back to life automatically with any vibration
- **EASY INSTALLATION**  
Ease of installation in minutes without technical knowledge
- **MONITOR UP TO 38 WHEELS**  
Systems for monitoring up to 38 wheels
- **DROP & HOOK SYSTEMS AVAILABLE**  
Need to change Trailers? Switch at the touch of a button

**IMPROVE TIRE WEAR, IMPROVE HANDLING, SAVE FUEL**

HawksHead Systems Inc is a leader in the Tire Pressure Monitoring Systems Industry.

We supply TPMS Systems around the World for many types of vehicles ranging from Race cars to Semi-Trucks and Trailers to Recreational vehicles and Industrial equipment.

While checking your tires before you drive is always recommended, problems usually arise when you are moving down the highway, picking up debris often starts a slow deflation before serious problems happen.

Using a HawksHead Tire Pressure Monitoring System allows the operator to be aware of any increase or decrease in pressure. Temperatures are also monitored allowing early recognition of dragging brakes and wheel bearing issues.

RV owners can monitor their Motorhome, truck and trailer or towed vehicle.

Using our Drop and Hook option, Trucking Companies can switch to different trailers at the touch of a button.

Installation is fast and the system can be quickly moved from one vehicle to another.

Monitors have their own battery pack and can be used as a wireless hand held pressure gauge when adjusting pressures.

The Systems are perfect for monitoring those tires which are out of the operators vision or when travelling at night.

The HawksHead Tire Pressure Monitoring System allows easy monitoring of those "hard to get at" wheels such as duals which often get less attention.

Older cars and trucks without TPMS can be easily fitted with a system offering the convenience and safety available as in newer vehicles.

Consider the many advantages of owning a HawksHead Tire Pressure Monitoring System.
